

# 1.6. TLS 1.2 1.6. TLS Version

## 1.6. TLS

RFC 5246 RFC 2246 TLS 1.0 TLS 1.2

## 1.6. TLS Version

Whenever Transport Layer Security (TLS) is used by this specification, the appropriate version (or versions) of TLS will vary over time, based on the widespread deployment and known security

vulnerabilities. At the time of this writing, TLS version 1.2 [RFC5246] is the most recent version, but has a very limited

deployment base and might not be readily available for implementation. TLS version 1.0 [RFC2246] is the most widely deployed version and will provide the broadest interoperability.

Implementations MAY also support additional transport-layer security mechanisms that meet their security requirements.
