

# 1.7. HTTP Redirects1.7. HTTP Redirects

## 1.7. HTTP

HTTP HTTP 302

## 1.7. HTTP Redirects

This specification makes extensive use of HTTP redirections, in which the client or the authorization server directs the resource owner's user-agent to another destination. While the examples in this specification show the use of the HTTP 302 status code, any other method available via the user-agent to accomplish this redirection is allowed and is considered to be an implementation detail.
